

In the meantime, they can pray and take solace that there will be a time for peace.

OCTOBER IS NATIONAL BREAST
CANCER AWARENESS MONTH

HON. SHELLEY MOORE CAPITO

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 30, 2003

Mrs. CAPITO. Mr. Speaker, I rise today to recognize Breast Cancer Awareness Month on behalf of the Hampshire County Cancer Coalition. October is Breast Cancer Awareness Month, a disease that will kill an estimated thirty-nine thousand, eight hundred women along with four hundred men in the year 2003 alone. It is through the extensive work of medical experts, as well as awareness groups like the Hampshire County Cancer Coalition, that there is hope to extinguish this horrible disease.

I am proud to recognize two Hampshire County residents, Clara Belle Lee and Nellie Lew, who are the two oldest living breast cancer survivors in our state of West Virginia. Ms. Lee has been a survivor for fifty-two years, and Ms. Lew has been a survivor for fifty-seven years. I was honored to have met these women, along with the rest of the Coalition, at the fourth Annual Breast Cancer Survivors Luncheon and wreath hanging ceremony. Their passion and their enthusiasm for life are characteristics of these two incredible women, who have beaten the odds of this fatal disease.

I would like to take some time to recognize the Hampshire County Cancer Coalition and their work. This organization has been instrumental in the state of West Virginia with educating the general public about cancer, as well as striving to initiate the early detection of cancers among women.

The Hampshire County Cancer Coalition was formed in 1993 under the direction of the Appalachia Leadership Initiative on Cancer, a cooperative agreement between the National Cancer Institute and Mary Babb Randolph Cancer Center, to address cancer control issues in our county. The Coalition has sought to increase public awareness and promote early detection of breast, cervical, and colorectal cancer throughout Hampshire County.

The Coalition has collaborated with various community entities in its cancer awareness efforts. Shortly after its formation, the Coalition sponsored two "Friend to Friend Summits," with one held in Romney and one in Capon Bridge. These summits brought together community members, cancer survivors, doctors and nurses for a sharing of the latest information regarding breast cancer awareness, prevention and treatment.

The Coalition has sponsored the Tower of Hope, which is a photo display of county breast cancer survivors dedicated to a charter member of the Coalition who is now deceased. The Tower is displayed in churches, libraries and the courthouse as a testimony to a courageous fight against a powerful disease.

Another focus area has been community education. Placemats with the warning signs of cancer were used in about twenty restaurants around the county. Business owners as well as patrons reported positive feedback.

In addition, the Coalition recently joined forces with the Tobacco Control Coalition to increase opportunities for promoting awareness.

Mr. Speaker, it is with great admiration and pride that I honor this wonderful organization as well as these incredible women and their strides to beat this disease. This disease is the leading cancer sited in women, yet with proper awareness and prevention, this disease does not have to be the leading cause of cancer deaths among women between the ages of forty and fifty-nine years of age. With organizations like the Hampshire County Cancer Coalition, and amazing women survivors, there are rays of hope for people diagnosed with breast cancer.

OCTOBER AS NATIONAL BREAST
CANCER AWARENESS MONTH

HON. TODD TIAHRT

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 30, 2003

Mr. TIAHRT. Mr. Speaker, I rise today in support of Breast Cancer Awareness Month. I am proud that October can be dedicated to raising awareness of the need for regular mammograms and doctor's visits. A member of my staff has come face to face with this disease, and I am proud to share her story. Hannah's mother was diagnosed with breast cancer in 1990 at the age of 38. Hannah was only 11 years old, with one older brother and two younger sisters, but she remembers being frightened when her parents told her about her mother's cancer. The doctor had found the lump, which was too small for her to feel. If she had not gone to the doctor, it would have spread fast and deadly.

Fortunately, because of awareness, Hannah's mother's cancer was found early, surgery was performed, and she has done great ever since. Fortunately, because of awareness, Hannah only remembers being frightened, but she doesn't have to remember losing her mother to breast cancer because that did not happen. This story is only one of many which emphasize the need for breast cancer awareness. We all need to insist that our mothers, sisters, aunts, grandmothers, wives, and daughters need to get regular mammograms and talk to their doctors about this disease. It is absolutely essential that the information gets out to these women, and that the cancer is caught early. Hannah is grateful that her mother paid attention and has since fostered this awareness in Hannah and her two sisters.

I support reauthorization for the National Breast and Cervical Cancer Early Detection Program. Breast cancer remains the second highest cause of death for women today. This is a reality that can stop only through awareness.

BREAST CANCER AWARENESS
MONTH

HON. DAVID VITTER

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 30, 2003

Mr. VITTER. Mr. Speaker, I rise today to honor victims, survivors, volunteers, and pro-

fessionals, who combat breast cancer each day.

The facts are grim, every 2½ minutes someone is diagnosed with breast cancer. An estimated 211,300 women and 1,300 men, in the United States will be diagnosed this year with breast cancer. An estimated 40,200 deaths are anticipated this year from breast cancer. In my home state of Louisiana, 3,800 new female breast cancer cases will be diagnosed this year, and 700 hundred women will lose their battle against the disease.

Breast Cancer Awareness Month provides a special opportunity to recognize these valiant fighters and to educate the public about the importance of monthly breast self-examinations and annual mammograms. Early detection greatly increases victims' chances of survival.

There is hope. When breast cancer is found early, the five-year survival rate is 96 percent. Monthly breast self-examinations and mammograms are the key components of early detection. I join my House colleagues in saluting the breast cancer survivors alive today in the United States.

I salute the volunteers across the country, including the Louisiana Breast Cancer Task Force, for their work to help educate people about the important life-saving measures of early detection. Thank you for taking time today to honor all the victims, survivors, volunteers, and professionals, who combat breast cancer each day.

REGARDING BREAST CANCER
AWARENESS MONTH

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 30, 2003

Mr. ACKERMAN. Mr. Speaker, every 12 minutes a woman in America dies of breast cancer. October is Breast Cancer Awareness Month, but I am not sure that awareness is the right word. Unfortunately, many of us are painfully aware. Many, if not all of us have known someone who has fought against this devastating disease. I would like to express my deep appreciation to the many soldiers in the battle against breast cancer. There are too many to name right now, but their dedication and tireless efforts are critical and so deeply appreciated by us all.

A recent study found that the presence of mutated BRCA-1 or BRCA-2 genes made cancer risk soar. This information proves that passage of legislation such as the Genetic Non-Discrimination in Health Insurance and Employment Act is imperative. Mr. Speaker, I am a cosponsor of this bipartisan legislation, which has 230 cosponsors. By not acting on this legislation, we are placing women's health in jeopardy on a daily basis. Women are not being tested because they fear they will be discriminated against by their insurer should they test positive. This is unconscionable.

This body has begun the job of funding the National Institutes of Health and cancer research over the past five years. However, our work is not done. It is imperative that we are able to fund new research and continue existing research. In order to ensure that progress is not lost and valuable information left uncovered, we must continue to increase funding for the National Institutes of Health.
